Cabbage

The Yellows Disease in Cabbage is responsible for the failure of many acres of this vegetable every year. This disease is prevalent from southern Wisconsin to the Gulf of Mexico, and from the Atlantic to the Rocky Mountains.

For many years scientists of the University of Wisconsin and others have labored to find a remedy until we now have several varieties which are practically immune to this disease, or properly called Disease Resistant. The varieties offered below are all disease resistant. We recommend them as worth while to grow.

Oz. $\frac{1}{4}$ lb. Lb.

Marion Market. Selected from Copenhagen Market. A splendid early sort for diseased soils. Heads are round, stem short (Crop failed).

Allhead Select. Flat head type. Short stem. Looks like All-head Early, from which it is selected. Quite early \$1.00 \$3.00 \$10.00

Wisconsin All Seasons. Second early, drumhead shape, heavy yielder60 1.70 6.00

Feverless Late Summer. A late Summer and Fall cabbage, which grows to large size. Heads do not split very quickly. The best for sauerkraut 1.20 3.40 12.00

Red Hollander. For those who have trouble growing Red Cabbage, this is the kind to plant for late Summer and Fall crop. Heads are ball shaped and solid 1.25 4.25 16.00

Bugner Cabbage

Henderson's Succession50 1.50 5.00

Premium Late Flat Dutch50 1.50 5.00

Danish Ballhead80 2.20 8.00

Danish Roundhead80 2.20 8.00

Holland Short Stem80 2.20 8.00

Mammoth Red Rock. Our strain is supreme. Large heads, dark color and solid80 2.20 8.00

American Savoy50 1.50 5.00

Large Late Drumhead Savoy .. .60 1.70 6.00

Perfection Savoy50 1.50 5.00

Notice!

We call your attention to the fact that the disease resistant varieties differ somewhat from the sorts from which they have been selected. This difference is chiefly in the color of leaves and heads, being a darker shade of green, which in our opinion adds to their appearance.

A NEW, SAFE SPRAY for Healthier Gardens

Safe For
Everything Ex-
cept Destru-
tive Insect Pests

Now your plants can be assured of positive protection against insects by using Sheps Plant Spray, perfected after five year's research. Most of the common pests can be practically exterminated when plants are young by thoroughly spraying the soil of the garden at least once a week, using half ounce of Sheps Plant Spray to one gallon of water.

Rids Infested Gardens, Too!

Sheps Plant Spray controls and kills both sucking and chewing insects including Aphids, Thrips, Green Flies, Red Spider, Mealy Bugs, Worms, Caterpillars and others. Sheps Plant Spray will not burn the tenderest plants. In fact, it is beneficial to soil, and keeps foliage in deep lustrous green health. **NON-POISONOUS** for human beings, birds, animals or pets.

Ready to Spray in 15 Seconds

Sheps Plant Spray is unusually simple to mix. Measure out the proper amount of the solution, adding four or five times as much water. After stirring for about 15 seconds, pour the mixture into the sprayer and add the required amount of water. It is then all ready to do its deadly work. No tedious and time-taking mixing—no soapsuds solution.

Let the Pictures tell the Story

The Gator-Hide Mulch Paper used here on Early Iceberg Lettuce not only yielded more to the row than the unmulched area at the right, but it produced lettuce that was of decidedly better quality and brought it to maturity *earlier* than lettuce planted at the same time on adjacent unmulched land. Note the clean, weedless area around the heads as shown in the bird's-eye view... Try Gator-Hide yourself this year.

Mr. Market Gardener—

EVER ONWARD is the spirit of the times. The march of progress is unceasing. Better automobiles are built, wider roads laid, finer radios manufactured. Improvements are noticeable on all sides. The Seed Industry is not taking a back seat in this onward march. By cross-breeding and single plant selections, including the development of bi-sexual plants, new varieties of vegetables and flowers have been obtained. It takes sometimes 5 or more years before a new breed becomes of fixed type, and some cross-breeds

never become fixed at all. In such cases, all efforts made, were in vain. Patience and perseverance are needed to make these improvements.

EVER ONWARD is also the spirit in our business. It has always been our aim to sell the best, and you may rest assured it will be so in the future.

We respectfully solicit your orders for 1930, which shall have our best attention. Call, phone or write as you like.
